Ideation Phase
Empathize & Discover

Date	23 October 2026
Team ID	0157CY241012
Project Name	EV Market Analysis (Team: Data Warrior)
Maximum Marks	4 Marks

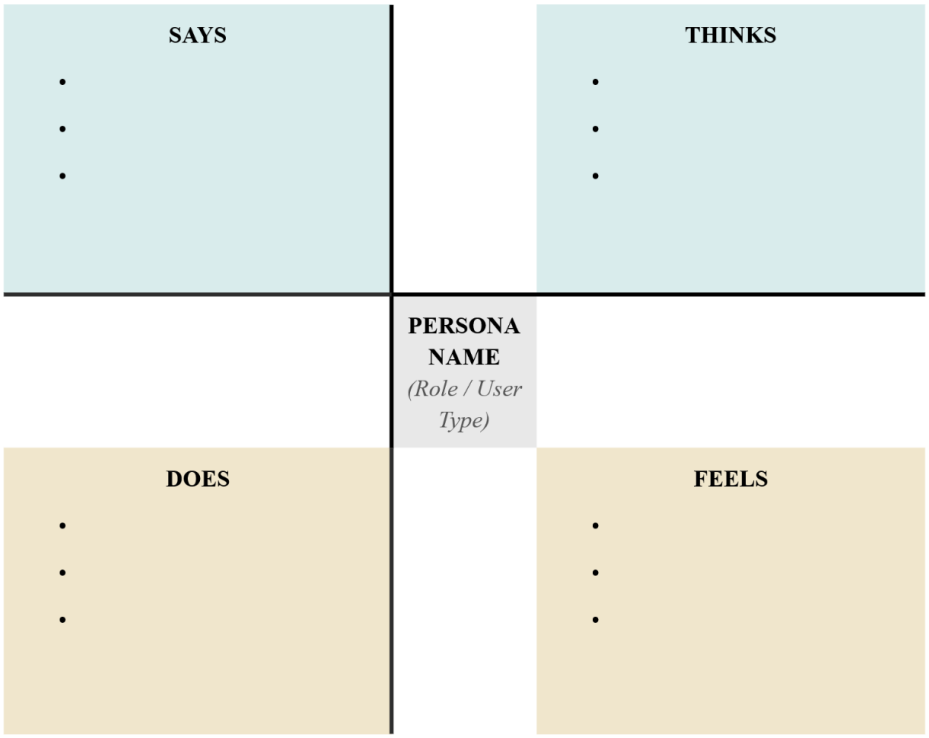

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy Map for EV Market Analysis:

User: Automotive strategy analyst / EV market decision maker

SAYS • Which EV segment or state is growing fastest? • I need one dashboard, not many reports. • Show me price vs range for each brand.	**THINKS** • Is Solid-State battery worth the investment? • Are SUVs the safest segment to bet on? • Can I trust this data for decisions?
DOES • Compares brands, prices and ranges manually. • Reads market reports and news. • Filters data by brand and body type.	**FEELS** • Confused by scattered data sources. • Worried about wrong investment choices. • Confident when a clear chart backs a decision.
PAINS • Data spread across many files. • No quick way to compare price-per-km. • Hard to see battery and range trends.	**GAINS** • One interactive Tableau dashboard. • Clear KPIs: sales, range, CO2 saved. • Faster, data-backed market decisions.
