Project Development Phase
Performance Test

Date	23 October 2026
Team ID	0157CY241012
Project Name	EV Industry Analytics & Intelligence Platform
Maximum Marks	

Project Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Dataset of 1,200 EV records (20 columns) covering 12 automakers, 6 vehicle categories and 5 battery chemistries (2021-2026), loaded into Tableau Public from ev_market_data.csv.
2.	Data Preprocessing	Cleaned nulls, normalized data types and removed errors; added Price-per-km and CO2 metrics. Automated integrity and range validation gave zero data errors (ev_market_data_cleaned.csv).
3.	Utilization of Filters	Filters on Year, Vehicle Category, Automaker, Battery Chemistry and Region, applied across all charts and KPI cards for interactive analysis.
4.	Calculation fields Used	Price per km (Price / Range), Total Revenue (Price x Deliveries), Average Customer Satisfaction, Energy Consumption (Wh/km) and Cumulative CO2 Displaced.
5.	Dashboard design	No of Visualizations / Graphs - 10 (sales by category, market share, battery chemistry timeline, regional distribution, price vs rating and KPI cards)
6	Story Design	No of Visualizations / Graphs - 3 story points, one per scenario (Emily Johnson, David Chen, Dr. Sarah Williams)
