Project Development Phase
Communication

Date	23 October 2026
Team ID	0157CY241012
Project Name	EV Market Analysis
Maximum Marks	

Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	Discord / Google Meet	Team Members	Daily progress tracking, sprint tasks alignment, and obstacle identification.
2	Progress Update	Weekly	GitHub Projects & Slack	Project Mentor & Team	Review milestone deliverables, data verification steps, and sprint burndown.
3	Issue / Bug Discussion	As Needed	GitHub Issues & WhatsApp	Lead Analyst & Team	Immediate debugging of Tableau calculations, data format mismatches, or layout anomalies.
4	Stakeholder Review	Bi-Weekly	Zoom Video Conference	Faculty Guide & Mentor	Demonstration of dashboard prototypes, feedback collection, and scope alignment.
5	Final Demo Rehearsal	Once	Google Meet (Recorded)	Full Team & Reviewers	Dry-run of final presentation, timing calibration, and

					slide/dashboard synchronization.
6	Code & Data Review	Bi-Weekly	GitHub Pull Requests	Project Reviewers	Ensuring clean documentation standards, code quality, and accurate data dictionary updates.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Asynchronous collaboration across different academic and project schedules.	Established centralized GitHub issue tracking and milestone boards with clear delivery deadlines.
2	Discrepancies in raw EV dataset metrics (units in miles vs. km, kWh vs. Wh/km).	Created standardized data transformation rules in Python/PowerShell and shared a unified Data Dictionary.
3	Tableau Public cloud formatting shift compared to local Tableau Desktop workbook.	Conducted dedicated cross-browser visual QA testing sessions and standardized dashboard layout dimensions to fixed pixels.
